

Veterinarian

The veterinarian team at Brighton Veterinary Hospital currently consists of 6 vets – some part-time and some full time. For part-time vets, hours and working days are flexible to accommodate personal circumstances.

Vets are rostered to regular surgery shifts and enjoy regular rostered days off. The team shares the Saturday morning shift, with each team member on average completing one Saturday shift every three weeks. The clinic is not open on Sundays or on Public Holidays.

We actively seek out vets with different interests as we believe a team with varying areas of interest underpins the strength of a team. This broad knowledge base provides excellent support to the vet team, and we believe this is reflected in the high level of veterinary care we deliver.

The clinic supports the vet team in developing special interest skills and postgraduate and membership study support. We are happy to provide financial and practical support, with any roster adjustments required to accommodate study commitments. In addition, we regularly partner with VetPrac, the University of Sydney, and Improve International for development.

The vets at BVH are empowered to deliver medicine as individual practitioners and are not limited by strict protocols. Graduate guidelines and a breadth of reference material are available for the veterinary team should they wish to utilise them.

The vet team at Brighton Veterinary Hospital is privileged to have a very loyal and supportive clientele. Many of the clients of BVH have been attending the clinic for several generations. In addition, the BVH clients are responsible pet owners who appreciate the vet's advice and expertise and are willing to follow our recommendations, helping to ensure our positive work environment.

An attractive remuneration package and additional benefits include vet board registrations, EPA license, Plumbs, and CVE subscription.

We are open to scheduling some locum shifts to help you determine if this is the right practice for you!

About Us

We have a positive and supportive work culture who have repeatedly demonstrated their emphatic support for each other in these challenging times. We are committed to ensuring staff enjoy a great work-life balance and feel valued and part of the family.

Brighton Veterinary Hospital is an accredited and purpose-built veterinary hospital. The practice consists of three consulting rooms (soon to be four), two triage/surgery tables, a dedicated surgery, and a radiology suite. We are a busy clinic that has experienced significant growth in the past few years. We have exciting plans for the future and would love for the right person to be a part of our future.

The practice is committed to ongoing investment in equipment. The hospital is furnished with a DR x-ray machine, ultrasound, video, rigid endoscopy equipment, iM3 dental x-ray unit and dental suite, De Souter and Stryker orthopaedic drill sets, and in-house pathology. In addition, we have recently purchased a Mindray Veta 5 anaesthetic machine with a built-in ventilator and Mindray EPM 12 patient monitor with capnography.

We are a clinic that is always striving to improve. At BVH, we focus on delivering excellent clinical outcomes and an exceptional client experience through investment in our staff, technology, and equipment.
