

# Commemorating your pet

---

A pet lover's support guide

We're here to support  
you in any way we can.  
Because we've been  
through it too.

We understand how difficult it is to say  
goodbye to a beloved family member, and the  
importance of honouring their memory. Our  
team consists of animal lovers who share our  
strong values and ethics and uphold them at all  
times.

We're here to help you through your grief and  
to provide you with the very best support and  
personalised service, whenever and wherever  
you may need us.

# Our 7-Point Pet Tracking System™

We work with a highly respected crematorium using a 7-step tracking system for your pet's private cremation to ensure that your pet's ashes are those of your pet alone. This provides complete transparency throughout every stage of the cremation process.

1

Your pet is assigned a unique ID number at the time of booking and we create an ID tag that lists your pet's details (name, breed and location).

2

Once your pet is in the care of the crematorium, they check the ID tag to ensure you've given authority to proceed to cremation.

3

The crematorium cross references the ID tag prior to cremation.

4

Your pet's ID tag is attached to the cremation chamber and re-checked before and after the cremation process.

5

The ID tag is checked against their Pet Tracker system when placing the ashes into your chosen urn or keepsake, and the ID label confirmed.

6

A final quality inspection is conducted to confirm your pet's details and any special requests.

7

Prior to returning your pet's ashes, one final check is carried out to ensure your pet's details correspond with our clinic details.
